Education

Indian Institute Of Technology (Indian School Of Mines)

Bachelor Of Technology, Electronics And Communication Engineering, GPA:8.75/10

Dhanbad

2013-2017

Skills

Languages: Python, R, SQL, C/C++, MATLAB, HTML, CSS, L^AT_EX

Packages: Keras, OpenCV, PyTorch, Tensorflow, OpenAI Gym, Django, Flask, Git

Experience

ZS Associates

July 2017 – Present

Data Science Associate

Pune, India

- Designed a real-time video recognition system to create a digital understanding of blackjack players at an entertainment center, which proposed over \$100MM of savings annually. Employed Mask R-CNN followed by a Fully ConvNet model to get the frame level information and stitched them in time using blackjack game play conventions.
- Performed Monte-Carlo simulations to understand the customer journey and luck induced volatility in their play behavior to tailor the promotion techniques at an entertainment center effectively.
- Implemented a multi-sized ConvNet with varying window sizes to detect and identify the adverse effects of a medical drug from live twitter feed.
- Identified Key Opinion Leaders in the health-care domain from Twitter data by leveraging page-rank algorithm.
- Implemented a LSTM based Autoencoder pipeline for a manufacturing client to analyze the real-time sensor data and predict anomalies in their batch and suggested key-drivers for non-conformance.

Analytics Vidhya

Mar 2016 – July 2016

Data Science Intern

Gurugram, India

- Conducted research on various classification, regression and clustering algorithms to create content for blogs and course material for data science enthusiasts.
- Built a recommendation engine for the job portal using a hybrid recommender system in python and its deployment led to a saving of 120 man-hour per month of the MIS team.

Texas Instruments - CEPD Lab, NSIT

June 2015 - July 2015

Summer Internship under Prof. Dhananjay V. Gadre

New Delhi, India

- Worked on register level programming, Embedded Systems and PCB designing.
- Implemented a game of dodge the wall in Embedded C. Also, developed a motherboard from scratch to station microcontroller, display and other components.

Key Projects

- **MedLens** | Second Runner-up at ZS Quest Hackathon
Used Bi-Directional Attention Flow network (BiDAF) to develop a web app for health-care researchers, which answers factual questions based on uploaded documents or searched on PubMed database.
- **NOAA Sea Lion Population Count** | Kaggle Bronze Medal
Implemented a fully connected convolutional neural net (FCNN) to count the number of different sea lions in aerial photographs. Also, experimented with U-Net and TIRAMISU semantic segmentation architectures.
- **Traffic Sign Recognition System** | B.Tech Thesis Project
Augmented the ResNet'15 ConvNet with a detector box at the top layer to induce attention towards the traffic signs present in the frame. It increased the accuracy by 2% on the LISA dataset as compared to vanilla ResNet.
- **Quora Question Pair Similarity** | Kaggle Silver Medal
Built an ensemble of LSTM and XGBoost models with over 80 linguistic features (word2vec, SVD, TF-IDF etc) to predict the similarity between question pairs on the Quora platform.
- **Smart Shower** | Second-runner up at Home Automation Contest on Instructables
Built a prototype of a smart shower using Arduino, which gets activated upon sensing the presence by using an ultrasonic sensor and responded by adjusting the water temperature.

Achievements

- Received best project and Hi5 awards in innovation category for introducing Computer Vision capability at ZS Associates.
- Became Kaggle competition expert within the first two months of joining by securing one silver and two bronze medals.
- Awarded as Regional Student Scientist in the year of 2008 by National Children Science Congress for surveying the air pollution levels in the city of Fatehpur by developing a home-made air quality predictor.

Extracurricular

- Volunteered at Kartavya (a student run non profit organization) at IIT(ISM) Dhanbad from Sept 2014 to March 2015. Taught Math to underprivileged Class V kids
- Managed Robotics Club at IIT(ISM) Dhanbad(2015-2016). Took various hands-on workshops on Embedded-C programming and PCB designing.
- Executive Director at TEDx ISM Dhanbad. My responsibilities included the direction of TEDx event and to manage the logistics for the event.

Relevant Coursework

Academic

- Machine Learning
- Digital Image Processing
- Database Management Systems
- Computer Networks
- Data Structures
- Computer Programming
- Numerical And Statistical Methods
- Methods Of Applied Mathematics

Online

- Practical Deep Learning For Coders II(FastAI)
- Practical Deep Learning For Coders(FastAI)
- Convolutional Neural Networks for Visual Recognition (Stanford)
- Deep Learning for Natural Language Processing (Stanford)
- Learning From Data (Caltech)
